## rev. 8-11-2020

## UNIVERSITY OF VIRGINIA RADIOISOTOPE SURVEY SHEET Room #:\_

- This form must be completely filled-in at least once during the week after you perform radioactive material work. You must use an indelible pen.
- Each counting system must be kept in a separate section. If you need to survey for H-3 (liquid scintillation counter) and I-125 (gamma counter), you must have 2 sections of survey records for each different detector
- If you don't perform radioactive material work during the week, check the "No Work this Week" box.
- For extended periods of radioactive material work inactivity, a statement such as "No work until further notice" accompanied by the date is allowed. When radioactive material work is re-started, simply begin your weekly surveys on the next available line.
- It is important to document why the survey is being performed. If it is a routine weekly survey, please use the box provided in the "Comments" section. If the survey is because of a spill, please indicate this in the "Comments" section and document a follow-up survey after the spill is cleaned on the next available line.
- PROBLEMS OR QUESTIONS CONCERNING SURVEYS? PLEASE CALL OEHS AT 982-4919
- For the most recent copy of this form visit www.ehs.virginia.edu and navigate to Radiation Safety Forms and Application

Date Month/day/ <u>year</u>	No work this week	Survey Locations Must refer to the lab map	Isotope Used	Survey Results In <u>DPM</u> only	GM Meter Op-Check Performed	Surveyor's Signature	PI	Reason for the Survey and other Comments Check this box if the survey was a routine weekly survey
